| WATER APPEARANCE | CLEAR | | | | |

Simple fountain nozzle comprised of a set of 4 mm water jets arranged in such a way that on rising they look like the trunk of a palm tree and on falling like its leaves.

The angle given to the jets means that, from wherever they are positioned, spectators can see the front and back jets cross over producing an esthetic effect of great beauty in the arquitectural fountain.

The range is comprised of three sizes with 20, 50 and 60 fountain jets.
